Ali Abbasov

Full Stack Web Developer

I'm an experienced web developer with a strong skill set in modern technologies. I've recently worked extensively with Next.js and React, seamlessly incorporating Typescript. In the past, I've successfully used Vue.js and Laravel. My adaptability and commitment to staying current with technology make me a valuable asset for diverse web projects.

Experience

2021 Feb - 2021 Jun
MyCookingLife | Baku, Azerbaijan
Full Stack Web Developer

I worked as a freelancer for a client who needed a portfolio website for a local pastry business. Laravel framework and MVC architecture were utilized to deliver a functioning website with features such as user authentication, admin dashboard, email sending

2022 Feb - 2022 Oct
Vantevo AS | Larvik, Norway
Full Stack Web Developer

Worked as a part-time web developer and collaborated with a team of developers and designers on multiple interesting projects such as a warehouse management system. I improved my skills in technologies such as React, Typescript and Laravel

Projects

2022 Feb - 2022 Jun
EvAl
Real Estate Advertisement Platform

As a final project in my last year at university, I developed an application where users can create real estate listings and look for other listings on the website. Features such as user authentication, user authorization, and real estate search from a map were implemented. The project was built using Laravel and Vue.js

2023 Feb - Present
Invoify
Invoice generator web app

A web app where users can generate a digital invoice based on their information. It can be used by freelancers or businesses and can be customized for their needs. Technologies used in this application are Nextjs, React and Typescript. The project is ongoing
